

SAMARTH PRAJAPATI

[773-742-3327](tel:773-742-3327) | prajapsr@mail.uc.edu | [linkedin.com/in/samarthprajapati](https://www.linkedin.com/in/samarthprajapati) | github.com/SamarthP7704

Summary

AI Software Engineer with experience building scalable AI systems, enterprise automation platforms, and cloud-native applications using Azure AI Foundry, React, Python, and modern backend technologies. Passionate about applied AI and distributed systems.

Technical Skills

Languages: Python, TypeScript, JavaScript, Java, C#, C++, SQL, HTML, CSS

Artificial Intelligence: Azure AI Foundry, LangGraph, LangChain, RAG, OpenAI, HuggingFace, PyTorch, Scikit-learn

Frameworks: React, Next.js, React Native, FastAPI, Django, .NET, Node.js, Drupal, TailwindCSS

Cloud & Infrastructure: Azure, AWS, GCP, Docker, Kubernetes, Power Platform, Power Automate, GitHub Actions, CI/CD

Databases & Tools: PostgreSQL, Redis, Qdrant, Supabase, Jira, Azure DevOps, Git, Postman, Figma, UiPath

Professional Experience

AI Engineer Co-op – Bendix Commercial Vehicle Systems LLC

January 2026 - Present

- Led development of VisionAgent, an enterprise AI platform serving 500+ employees using Azure AI Foundry and LLMs
- Produced 10+ Azure Functions and Power Automate integrations that streamlined secure AI orchestration across workflows
- Engineered retrieval-augmented document intelligence pipelines for PDF, Word, and Excel using enterprise knowledge bases
- Reduced manual processing by 85% through automation of 1000+ monthly utility bills across 50+ global facilities worldwide
- Established a reusable React-based Power Platform architecture with 20+ shared components adopted across multiple teams
- Modernized enterprise time reporting for 500+ employees by replacing spreadsheet workflows and centralizing workforce analytics

Web Developer Co-op – Cummins Inc.

January 2024 - July 2024, January 2025 - April 2025

- Improved LMS reliability for 100+ employees, reducing user-reported issues by over 30% through platform enhancements
- Developed 50+ reusable TailwindCSS and Material UI components to standardize scalable responsive enterprise interfaces
- Integrated bpmn.io into 10+ Drupal modules, enabling interactive workflow visualization across enterprise training systems
- Enhanced website maintainability by delivering 10+ modular Drupal components supporting enterprise content management
- Partnered with UX, QA, and content teams to launch an internal learning platform supporting 100+ employees

Teaching Assistant – University of Cincinnati

August 2023 - Present

- Mentored 500+ students across 4 semesters through 50+ one-on-one sessions covering EV3 robotics and computer science
- Strengthened debugging and programming fundamentals by leading 50+ tutoring sessions in Python, MATLAB, and LabVIEW
- Supported weekly laboratory instruction by troubleshooting technical issues and assisting faculty during hands-on sessions

Selected Projects

VidRAG – Hybrid Retrieval Video Intelligence Platform

June 2026 - Present

- Designed a 7-stage RAG pipeline transforming videos into structured notes, timestamped summaries, and conversational AI
- Boosted retrieval quality through hybrid search combining BM25, Qdrant vectors, and cross-encoder reranking
- Enabled multimodal ingestion across 2 input sources and 3 content types using semantic chunking and timestamp processing
- Built an evaluation pipeline using LangGraph, Langfuse, and RAGAS to orchestrate agents and measure retrieval quality

TaskOrbit – Distributed Browser Automation Platform

May 2026 - Present

- Architected a replayable browser automation platform using FastAPI, Playwright, Redis, and Docker for enterprise workflows
- Scaled browser execution through asynchronous Redis workers and Dockerized services for concurrent task processing
- Introduced deterministic workflow replay through retries, WebSocket telemetry, and enterprise artifact capture pipelines
- Automated enterprise browser workflows including authentication, invoice extraction, downloads, and form submission

PrepPAL – AI Meal Planning Platform

March 2026 - April 2026

- Developed a cross-platform nutrition assistant using React Native, Supabase, and AI-powered recommendation pipelines
- Enabled realtime synchronization through 5 Edge Functions supporting seamless communication across mobile and cloud services
- Personalized meal planning through 4 AI recommendation pipelines powered by server-side inference and intelligent caching
- Streamlined daily nutrition management through automated grocery generation, calorie tracking, and notification workflows

Education

University of Cincinnati

August 2022 - May 2027

Bachelor of Science in Computer Science
